We assumed a lifetime of 20 years and an interest rate of 6% for the low cost scenario and 10% for the high cost scenario, which gives a capital recovery factor in the range 8.7–11.7%. This information can be found in section 4.1: “Assuming an interest rate in the range 6–10% and a lifetime of 20 years, the capital recovery factor is in the range 8.7–11.7%.”
